Joint Statement on Continuing iPoker Legislation to 2015

Our tribal governments have been deliberate and methodical in developing proposed legislation that would strictly regulate and limit Internet poker in California.

Instilling public confidence in the integrity of State-sanctioned Internet poker is a fundamental principle of ours. To that end and in consultation with the bill authors, our tribal leaders have concluded that rushing a bill in the closing days of this legislative session will not allow for the level of careful public examination and confidence an issue of this magnitude requires.

We look forward to continuing the work with legislators, regulators, and stakeholders on a bill that can be brought before the Legislature in 2015.
